

Sumter Electric Membership Corporation

Outdoor Lighting Service Schedule OL-9

Availability

Throughout the Corporation's service area from existing lines of adequate capacity. Mercury Vapor lighting fixtures are not available for new installations after July 1, 2008.

Applicability

Applicable only under long-term contract (one year or more), for dusk to dawn lighting of member property by means of photoelectric-controlled, ballast-operated mercury vapor, high-pressure sodium, or metal halide fixtures, and poles conforming to the Corporation's specifications, subject to the established Service Rules and Regulations of the Corporation.

Monthly Rate:

A. Fixture Rates:

(Prices are for fixtures only and do not include any pole charges. See Section B for pole charges.)

<u>Lamp Nominal Wattage</u>	<u>Type</u>	<u>Monthly Rate Without Contribution-in-Aid</u>	<u>Monthly Rate With Contribution-in-Aid</u>

B. Pole Rates:

(Charges when a pole is required exclusively for the fixtures.)

<u>Mounting Height</u>	<u>Pole Type</u>	<u>Monthly Rate</u>
EP ¹	Existing Pole	No Charge
24	Wood	\$ 2.00 per pole
16	Concrete, Decorative	\$ 8.50 per pole
16	Concrete, Round, Direct Burial	\$ 8.00 per pole
20	Concrete, Round, Direct Burial	\$ 8.50 per pole
25	Concrete, Round, Direct Burial	\$ 9.50 per pole
30	Concrete, Round, Direct Burial	\$ 10.00 per pole
35	Concrete, Round, Direct Burial	\$ 15.50 per pole
40	Concrete, Round, Direct Burial	\$ 16.00 per pole
10 or 16	Fiberglass, Direct Burial	\$ 4.25 per pole
25	Fiberglass, Direct Burial	\$ 11.25 per pole
16	Aluminum, Direct Burial	\$ 4.50 per pole
25	Aluminum, Direct Burial	\$ 13.25 per pole

¹ Existing pole heights are dependent upon distribution pole location. There is no charge when the fixture is mounted on an existing pole.

30	Steel, Anchor Base	\$ 14.75 per pole
35	Steel, Anchor Base	\$ 16.25 per pole
40	Steel, Anchor Base	\$ 17.50 per pole
50	Steel, Anchor Base	\$ 24.75 per pole

- C. The Corporation reserves the right to require a non-refundable contribution in aid of construction for fixtures and poles installed. Where a contribution in aid of construction is made for other than wood poles, the member will be charged a rate of \$3.00 per month per pole for maintenance and replacement costs. Maintenance and replacement costs included in the maintenance fee include repair or replacement due to normal wear and damage from acts of nature, but do not include damage from negligence, accidents, or vandalism.
- D. Where it is necessary to install a transformer and secondary service to be used only for the outdoor lighting, then in addition to all other charges, a monthly charge of \$2.00 will be made.
- E. Overhead service to lights will be provided up to a distance of 200 feet per fixture (averaged between all fixtures at premise). A non-refundable contribution in aid of construction of \$2.00 per foot will be charged for service distances over the allowed 200 feet per fixture. Where existing poles must be changed to accommodate the desired mounting height, a non-refundable contribution in aid of construction will be charged.
- F. Underground service to lights will be provided up to a distance of 100 feet per fixture (averaged between all fixtures at premise). A non-refundable contribution in aid of construction of \$2.70 per foot will be charged for service distances over the allowed 100 feet per fixture. Where obstructions such as sidewalks or paving exist, the member will be required to perform trenching or boring under the obstruction, install duct provided by the Corporation, back fill, and repair disturbed sidewalks or paving.
- G. Where a lighting system is installed on a single premise and the Corporation determines that sufficient economies of scale in the construction, operation, and maintenance of the system will be realized, the Corporation may waive the monthly pole maintenance and/or transformer charges, subject to the following conditions:
1. The Corporation reserves the right to require a non-refundable contribution in aid of construction for fixtures and poles installed.
 2. The fixtures must be in close proximity to one another, so that an average of at least 10 fixtures is connected per secondary service.

- H. Where right-of-way obstructions exist, the member will be responsible for all right-of-way clearing, unless otherwise agreed to by the Corporation.
- I. Where the Corporation provides primary metered electric service for the member's other usage and the outdoor light is connected so that the power for operation of the light passes through that primary meter, the charges in Section A above shall be reduced by an amount equal to the total (lamp plus ballast) wattage of the fixture times \$0.0117 per watt, and Section B of the Conditions of Service stated below shall apply in addition to all other applicable provisions set forth herein.

Conditions Of Service

- A. The Corporation shall furnish, install, operate, and maintain the outdoor lighting equipment, including lamp, fixture, bracket attachment, control device, poles, and service drop, electrically connected so that the power for operation of the light does not pass through the meter for the member's other usage, unless otherwise mutually agreed to by the member and the Corporation.
- B. The Corporation shall operate and maintain all outdoor lights billed in conjunction with primary metered service under Section I of the above Monthly Rate, and the poles thereto attached, as follows:
 - 1. Lighting equipment and poles must be the property of the Corporation.
 - 2. Maintenance shall only be performed on the outdoor lighting equipment and poles to which that equipment is attached.
 - 3. Member-owned underground conduit and conductor used for the outdoor lighting system shall remain the property of the member, and the member shall be responsible for the proper operation and maintenance of such underground facilities.
 - 4. Upon failure of any member-owned underground facilities, should the member request that the Corporation replace those member-owned facilities with Corporation-owned facilities, the Corporation may charge the member a non-refundable contribution in aid of construction to cover the cost of that installation.
- C. The Corporation shall maintain the lighting equipment, including lamp replacement, at no additional cost to the member, as soon as can reasonably be done after notification of Corporation by the member that service has been interrupted. However, the member shall reimburse the Corporation for the cost of any such maintenance work that is required because of vandalism.

Schedule OL-9
Page 5

- D. The lighting equipment shall remain the property of the Corporation, including poles installed when the member makes a non-refundable contribution in aid of construction. The member shall protect the lighting equipment from deliberate damage.
- E. The poles for support of the fixtures are to be:
 - 1. Wood, metal, concrete, or composite poles of the Corporation's existing distribution system or extensions from the system, or
 - 2. Poles owned and installed by the member, conforming to standard RUS specifications and mutually satisfactory to both the member and the Corporation.
- F. The number and location of service points shall be as specified by the Corporation.
- G. A non-refundable contribution in aid of construction will be charged to cover any cost in excess of the cost of standard fixtures.
- H. Outdoor lighting service shall be provided only at locations that are accessible to Corporation trucks for servicing purposes. Also, the member shall allow authorized representatives of the Corporation to enter the member's premises and to trim trees and shrubs as necessary for maintenance of the lighting equipment and for removal of the lighting equipment upon termination of service under this schedule.

Terms Of Payment

Bills are due when rendered monthly. In the event the current monthly bill is not paid within fifteen days of the billing date, the bill becomes delinquent.

Term Of Contract

The Corporation and the member shall execute an agreement for service for an original term of not less than twelve (12) months and continued thereafter until terminated by either party on thirty days written notice, but the Corporation may require a contract of original term up to five years.
